SESSION DESCRIPTION:

With the advancements in the field of technology, the Internet of Things (IoT) is becoming of utmost priority. IoT has shown its applicability with advanced features that are used in every field. As a number of features are involved in the design and implementation, security is the main concern. In order to have security in the system, security metrics are also introduced. This special session not only focuses on key elements required in the design framework of the entire system but also on security measures needed to preserve the confidentiality,

integrity, and availability of the system. It also covers titles in the latest fields, such as Machine Learning, Deep Learning, Blockchain, Wireless Sensor Networks, Artificial Intelligence, and IoT. This special session welcomes unpublished research articles from researchers in academia and industry such as students, engineers, research scholars and scientists.

PUBLICATION AND SUBMISSION PROCEDURE

The conference aims at carrying out double-blind review process. The papers submitted by the authors will be assessed based on their technical suitability, the scope of work, plagiarism, novelty, clarity, completeness, relevance, significance, and research contribution. The conference proceedings will be published in **Springer LNNS Series (Scopus)**.
